QUALITY - FULL STOP

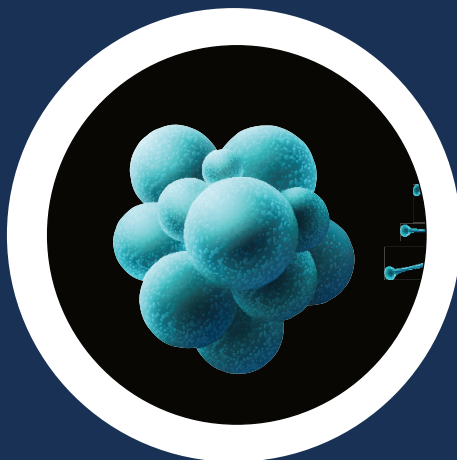

All our products are developed, manufactured and tested to very high standards.

Solid Surface Products are stain resistant and tested according to "BS EN 14688:2015 Standards". Test results have achieved 100% stain resistance according to the protocol.

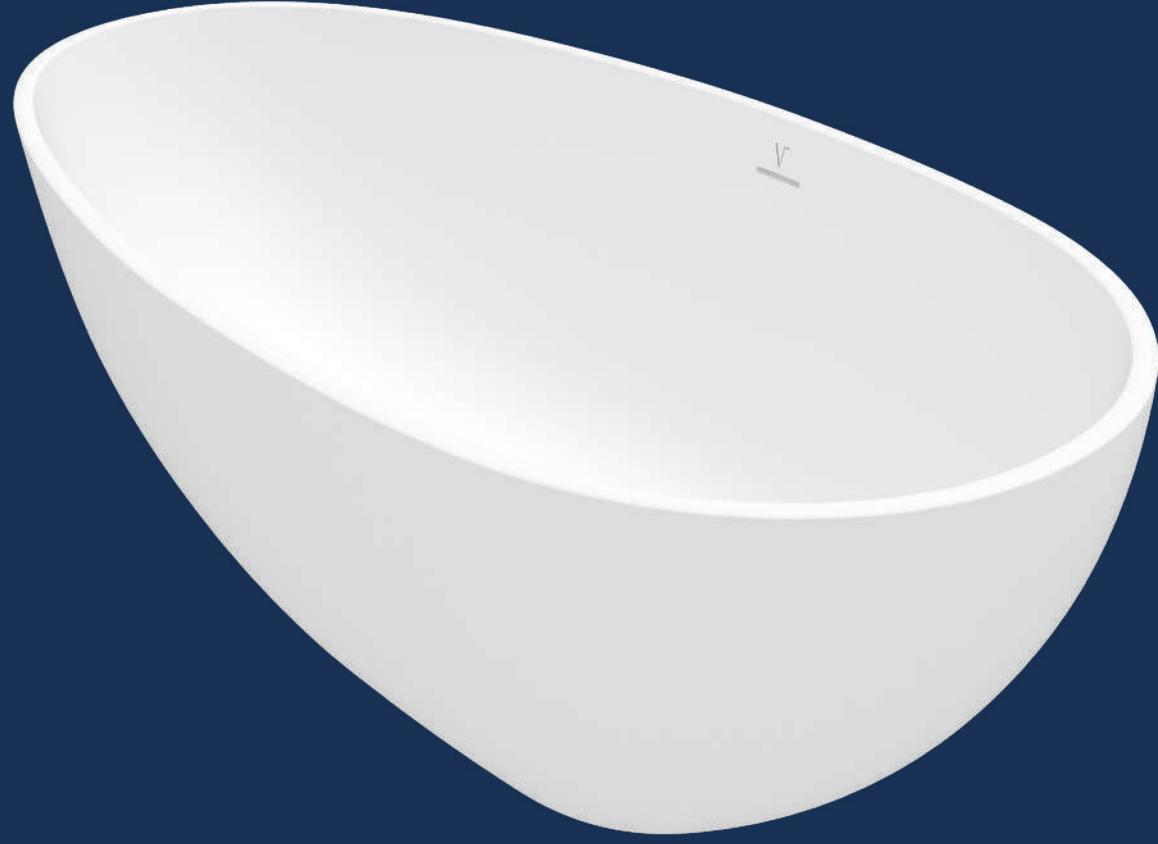

VICHESA Solid Surface Products are easy to clean with standard household cleaning agents. In case a stain does occur, it can be simply sanded off with the sponge provided. This applies to Matte products only.

Solid Surface Products are non-porous; moist cannot penetrate the material. Therefore Bacteria is unable to develop, keeping the Product clean and hygienic.

VICHESA Acrylic Bathtub Products are tested for deterioration and abrasion resistance in a 5-year test performed by IAPMO R&T Inc. of USA

VICCHESA

Refined Bathrooms

QUALITY - SOLID SURFACE PRODUCTS

As the name suggests, Solid Surface Products are not hollow or layered, but solid throughout. This results in numerous benefits such as longevity, none-porous finish and a warm feel to the touch. Even if the product does stain, it can be easily removed with the provided sanding sponge, making the product look like brand new
